How to Update Your Profile Information

The information you provide in your profile will be made available only to other members of the association. With the exception of your Name, Boat Name, and Hull Number, all of the other fields are optional. If you do not want your fellow Manta owners to have access to any of the information in your profile, simply don't share it!

Below are the instructions on how to update your profile:

1. Log in to mantaowners.org. If you are not currently registered, you will need to register and before you can continue.
2. Hover on the the REGISTER/LOGIN tab and click on "Update My Profile"
3. Update any information that you would like and then click "Update Profile" at the bottom of the page.

Some Additional Information:

1. The Proofreading Section is intended to be used for posting of Blogs which we call "Member Adventures" on the website.
2. The Post by Email option located in the center of the page is for making Blog Posts (Member Adventures) via email. There is a separate help document that discusses how to post forum topics/replies by email. Please refer to that document.
3. If you change your boat location here, it will NOT automatically update the "Where We Are" map. Currently, we have to run a manual update routine periodically to create a new map. We TRY to update the map weekly, but it may be longer if not many people are updating their current location.
4. You may wonder why there are items on the profile page that are not really relevant to us. Great question. It all comes down to \$\$\$\$\$. In developing this site, we opted to use Wordpress, which is a really great tool for quickly building powerful websites. But, there are some things that can't easily be changed without custom programming. This order information is displayed on this page is one of those things that it would cost money to change and I didn't think it was worth the additional investment...
